

Juniper Networks Training

George Mason University Fairfax Campus

Operating Juniper Networks Routers in the Enterprise

March 31-May 16, 2009

Do you know how to install, configure, analyze and troubleshoot Juniper Networks Routers?

Join your peers in an instructor-led course that focuses on installation, configuration, operational analysis, and troubleshooting considerations of Juniper Networks routers in the enterprise. Offered with a combination of lectures and labs, the introductory-level program offers hands-on experience with J-series platforms and JUNOS software.

This program is intended for end users of J-series platforms, such as network engineers, support personnel, reseller support, and anyone else who is responsible for implementing Juniper Networks Enterprise Routing products.

OJRE is an introductory-level course. The OJRE prerequisite is a basic understanding of the TCP/IP protocols.

Benefits Include:

- Juniper authorized training
- Increased value to employers
- Provides a path to Juniper certification
- Learning spaced over 6-week time frame
- Class days and times are perfect for working professionals and students

For course description and content see: www.juniper.net/training/technical_education/courses/EDU-JUN-OJRE.html

Dates: This program will begin on March 31st and end on May 16th. It will be held on Tuesday evenings (3/31-5/12) with three additional Saturday sessions (5/2-5/16) for a full ten meetings. Tuesday evening classes will run from 7:20 – 10:00 pm; Saturdays from 9:00 am – 12:00 pm. (Classes will be held on the following dates: 3/31; 4/7; 4/14; 4/21; 4/28; 5/2; 5/5; 5/9; 5/12; 5/16)

Location: GMU Fairfax Campus

Cost: \$1500 (\$995 for current GMU students, on a space available basis)

Optional certification exam not included; to register for Prometric Exam JNO-342 (JNCIA-ER) Juniper Networks Certified Internet Associate (\$125), see the Prometric web site at <http://www.prometric.com/Juniper/default.htm>
