

International Computer Internships Available

GlobeLearn-IT specializes in IT consulting internships.

Our Mission is to obtain you an internship in an Argentinean or South/Central American IT consulting company, which are currently working with top US, European and South American companies on outsourcing and remote sourced team projects. (These projects are sometimes with Fortune 500 and Global 1000 companies). We will match you with your expertise or goals in technologies to advance or learn new skills.

Your internship will expose you to processes and best practices of working with remote teams with exciting and challenging projects.

GlobeLearn-IT will expose you to world class projects and make you aware of current project management methodologies. This experience will open your mind as well as doors when you return back to your home countries. With our placement program we can often assist you in the placement in a top US or European companies after your internship.

We believe the educational experience in working on outsourced and remotely staffed teams can only be obtained by working on real world projects with remote teams. The cultural experience of working abroad with a team of local IT professionals is an experience that you will maintain with you for life.
