Cyber Technology and Computer Forensics
In Law Enforcement

When: Wednesday, October 9, 2013, 4:00 PM – 6:00 PM
Where: Mason Fairfax Campus, Research Hall 163
Who: The Federal Bureau of Investigation

If you assume anything about criminals, assume that Cyber Technology and Computer Forensics are fields that are constantly evolving, limited only by an individual's imagination. Criminals are leveraging technology to bring new levels of organization and sophistication to commit crime and evade law enforcement. Join the FBI in a discussion about investigating this criminal activity, solving cases, preventing terrorism, and the computer forensics that make it possible.
