

Automation Committee Hosts NIST at GMU to Discuss Future of Construction

Ranjit Sahai, ASCE-NCS President and Automation Committee Chair

Ever wonder how civil engineering construction is likely to look like in the not too distant future? Come join the NCS Automation Committee from 6-7:30pm on January 28, 2014 at George Mason University, Fairfax Campus for a fascinating look at the construction industry. Much of construction has remained low-tech for decades and is poised to be revolutionized with mechanized robotics at the construction site.

This is a free event (food will be served at no cost to attendees after the presentation) and is sponsored by the NCS Automation Committee and the ASCE GMU Student Chapter. We will have Dr. Kamel Saidi, a Guest Researcher at the National Institute of Science and Technology. Dr. Saidi is with the University of Texas at Austin and has a special interest in construction robotics and automation.

Directions with building and room number for the presentation will be posted on the Section's Website as soon as they are confirmed by GMU. The event is open to all NCS members and ASCE Student Chapter members at GMU and other universities. Feel free to contact gmuasce@gmail.com for location and directions, or president@asce-ncs.org for details about the presentation.
