

SAS Resources for Students

SAS provides the following programs to university students to enhance the use of SAS in academic course work and research.

Access to SAS Software

SAS University Edition is a no-cost, packaged offering of core SAS software. It is available to students, professors, academic researchers and lifelong learners. Once you download it to your PC, Mac, or Linux workstation, SAS works through virtualization software via your browser in standalone mode.

Go to http://www.sas.com/en_us/software/university-edition.html for details.

SAS e-Learning - You have free access to the following e-Learning courses:

1. SAS Programming Introduction: Basic Concepts
2. SAS Programming I: Essentials
3. SAS Programming II: Data Manipulation Techniques
4. SAS Programming III: Advanced Techniques and Efficiencies
5. SAS Macro Language I: Essentials
6. SAS SQL I: Essentials
7. Introduction to Statistical Concepts
8. Statistics 1: Introduction to ANOVA, Regression, and Logistic Regression
9. Predictive Modeling Using Logistic Regression

To activate your e-Learning:

- 1) Go to support.sas.com/myelearn and log into your profile. If you do not currently have a profile, please create one using the link on this page.
- 2) Enter the Mason activation code (G70008900) into the activation code box, then click **Submit**. Review the license agreement and select **I agree** to accept it.
- 3) You should now see the training in your list of active courses and the date on which your access expires. Select a course title to start your learning. (Note: You may see more courses than those listed above.)

To access your e-Learning once it has been activated:

Once your e-Learning has been activated, visit support.sas.com/myelearn or select **My Training** from any page on the SAS training Web site and log into your profile to access your training.
