

Get paid for putting your classwork to good use this summer!

Elvis needs boats, Mars needs women and PSI needs Construction Materials Testing Technicians in Fairfax Virginia!

PSI, the national civil engineering firm, has an immediate need for entry-level technicians performing soil and concrete testing in our Fairfax Virginia office.

Are you still not sure of why you had to do some of those homework problems? Come and find out why as you gain experience working on some of the largest Civil engineering projects in the mid-Atlantic area. Be prepared to work hard and get hot, dirty and sweaty as you apply what you have learned in school.

Requirements

Preferred individuals for these positions will have an early undergraduate to graduate level knowledge of the materials and processes of the construction industry. Any previous positions in the construction industry is a plus and if you already have certifications such as: VDOT, ACI, WACEL, NICET and/or Troxler, you will be a very strong candidate

PSI is a Drug-Free Workplace and as a condition of employment, new hires are required to take and pass a pre-employment drug test.

An Operator's license with a clean driving record is a must. The ability to work outside in a construction environment and the ability to repeatedly lift heavy objects (concrete/soils test equipment & specimens) is also a must.

Paid training, vacation, 401K, health insurance, dental, vision, life insurance, sick leave, company vehicles (all benefits in accordance with company policies as published in the new employee guide). High school diploma or equivalent. (EOE M/F/D/V).

What can you expect?

You will get an accelerated course in concrete and/or soil testing and you will then be expected to pass the WACEL test(s). You will start working on one or more projects alongside more experienced techs and will become experienced in a comparatively short time and get paid while learning. You will finish the summer with great stories, an appreciation of what it takes to actually construct something and maybe some money in the bank. Questions about why some of the homework problems are important will be answered and you will have great experience to show on your resume.

What do we get?

Besides the summer technical help, the big secret is that we will know you. If you like the work you are doing, you will probably have an inside track for a permanent job after you graduate since you know us and we will know you.
