

COMPANY DESCRIPTION

Gurukul is a fast-paced, challenging start-up company based out of Los Angeles, CA with exciting opportunities and huge potential. We offer excellent benefits, travel opportunities, competitive salaries and a casual work environment. If you are interested in being part of a fun, dynamic workplace, working with cutting edge technology in an emerging market, GuruCul is for you!

DESCRIPTION

GuruCul is currently seeking highly motivated Cyber Security Solution Specialists to work with a wide variety of clients implementing state of the art user behavior analytics solutions. The position offers variety, challenge, responsibility and the opportunity to realize your potential. Qualified candidates will be well-rounded individuals who have interests in implementing robust, scalable, enterprise security platforms. Cyber Security Solution Specialists install, setup, troubleshoot, and train customers on our cutting edge enterprise security software solution. Non-travel days will be spent resolving issues from previous implementations, sales support and preparing for your next project.

RESPONSIBILITIES

- Deliver of efficient, maintainable, robust and reusable enterprise solutions
- Install, integrate, and deploy Gurukul's predictive analytics products in enterprise client environments
- Gather, analyze, and document post-sales requirements
- Maintain familiarity with support versions of our product, platform, procedures and processes and technology supported
- Communicate with customers during the implementation process, progress and completion
- Direct and perform follow up as necessary to complete projects and elicit customer satisfaction
- Follow installation standards, project plans and related documentation to ensure a high level of success during the implementation process
- Deliver technical training designed to enable/educate clients
- Report project status, schedules, issues, resolutions and completions to Project Manager

EDUCATION AND EXPERIENCE

- Experience setting up and installing software on both Windows and Unix (Linux, Sun, HP, AIX) platforms.
- Basic understanding of Databases (Oracle, Sybase, MySQL) & Directories (LDAP, AD).
- Excellent communication skills and extensive experience working with clients, partners and vendors.
- Strong Organizational Skills
- Background check and drug screen

- Enterprise Security Experience with or experience in Enterprise IDM or Security solutions as part of an enterprise software company or systems integrator is a plus
- Experience in a startup company is a plus.
- Bachelor's or Masters in Computer Science / Engineering
- J2EE certification is a plus
- CISSP certification is a plus

LOCATION/TRAVEL

Position is based in Los Angeles, CA. This position requires approximately 50-75% travel
