(lunch will be  
provided)  
Thursday,  
September 29, 2016

### **Subject**

"Spine Deformity  
Surgery:  
An  
Overview"

### **Biography:**

Dr. Brian McHugh is a neurosurgeon at Inova Fairfax Hospital. He joined Inova from the Hospital for Special Surgery/Cornell University

Department of Orthopedic Spine in New York, where he completed a fellowship in adult and pediatric scoliosis and spinal deformity surgery. During the course of his residency at Yale University, he also completed two enrolled fellowships in minimally invasive spine surgery and spinal deformity surgery. With training in both neurosurgery and orthopedics, Dr. McHugh is able to offer a truly comprehensive approach to patient care and works with a sophisticated multi-disciplinary team to meet each of his patients' treatment goals.

Dr. McHugh treats all neurosurgical conditions and has a special clinical interest in the management of complex spinal deformities with minimally invasive techniques.
