

# Software Engineer

**Reston, Virginia**

## **Job description**

We are seeking a motivated junior software engineer in Reston, VA. In this position you will leverage your technical expertise to keep our country safe. You will:

- Collaborate with a small software engineering team developing digital forensic tools
- Write new software and maintain existing systems
- Write one-off exploitation tools to process data not yet supported by enterprise systems
- Provide operational support for commercial and government digital forensic platforms
- Integrate new digital forensic capabilities into an existing enterprise architecture
- Work with digital forensic analysts to create and productize new capabilities

We require:

- B.S. in Computer Science (or related) with 0 to 3 years' experience
- **US Citizenship, with ability to obtain TS/SCI Clearance**

## **Desired Skills and Experience**

Java, Python, SQL, C#, .NET Framework, Git, Software Development, C, C++

## **Apply**
