“New Technologies and the Future of Military Power”

Friday, February 10th, 4:30-6pm

Founders Hall, room 113

3-D printing, drones, artificial intelligence, and other emerging technologies promise major changes for societies around the globe. They also have major implications for military and national power. Join us on Friday February 10th at 4:30pm as Dr. T.X. Hammes of the National Defense University explains how these technologies will shape the future of conflict.
