

RESEARCH AND STATISTICS INTERN

Position Description

We are a fast-growing consulting firm focused on helping our clients create high performance workplace cultures, and we are looking for a summer Research and Statistics Intern. We are looking for someone who is tech savvy, detail oriented and enjoys taking initiative. We work in a casual, upbeat open workspace environment in the heart of downtown Arlington, VA (Clarendon).

Location: 3100 Clarendon Blvd., Ste 200 Arlington, VA 22201 (Metro accessible)

Hours: 20 hours per week (Flexible)

Pay: Hourly rate equivalent to \$12-\$16 per hour

Principle Duties & Responsibilities

Research topics include: employee engagement, manager best practices, positive leadership, effective communication, positive work cultures, etc.

Perform econometric and statistical analyses of employee engagement summaries. Access to statistical programs such as SAS, STAT, and R, preferred

Collect, manage and analyze large quantities of data

Integrate statistical analyses into research summaries

Communicate findings through a variety of mediums (such as Tableau, DOMO, etc.)

Review findings and provide support for E3 Solutions Leadership Team

Skills & Requirements

Superior organization and attention to detail

Software skills (strong MS Word and Excel) are required

Excellent communication skills and strong command of the English language

Ability manage multiple projects and work assignments

Experience with one or more of the following technical competencies: statistical analysis, programming, data management, policy research, or study design

Experience with market research

Strong analytical skills

Qualifications

An undergraduate student or graduate school student currently pursuing a degree in marketing, business, statistics, economics, industrial psychology, public policy, communications, sociology or equivalent related experience

Apply
