PAID SUMMER RESEARCH OPPORTUNITY

Interested in personalized Medicine?

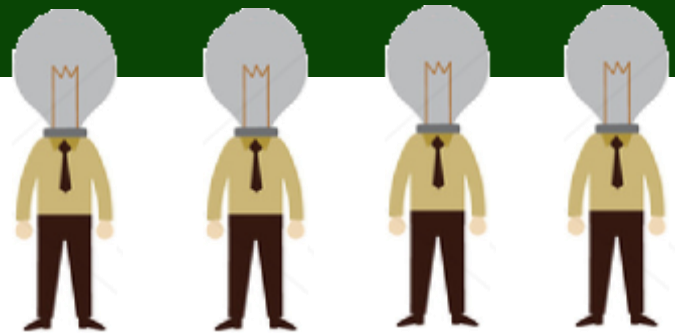

Interested in Big Data?

Like web development?

...then we have a summer project for you!

Medical technology and our understanding of disease has evolved exponentially over the course of the last century. We now understand that small differences in the individual human genome can account for vastly different patient outcomes during similar therapies. The study and treatment of disease has, therefore, become a multidisciplinary field with the need for experts in computer science, biology, medicine, and mathematics.
