

The rebless™ Clinic web-based platform is used by providers to prescribe exercise regimens, access patient data, and perform telemedicine visits.

Main Features & Benefits

Effective & Efficient Patient Management

The rebless™ Clinic dashboard organizes all profiles so providers can easily view and navigate patient data.

Therapy Regimen Assignment

Prescribe reps, exercise time and levels of assistance or resistance to maximize patient recovery.

Increased Access and Patient Engagement

Telemedicine capabilities improve communication with your patients and increase their access to care.

Treatment Tracking & Reporting

All data from patient rebless™ exercise sessions is transferred to the Clinic app so activity and progress can be monitored and accessed at any time.

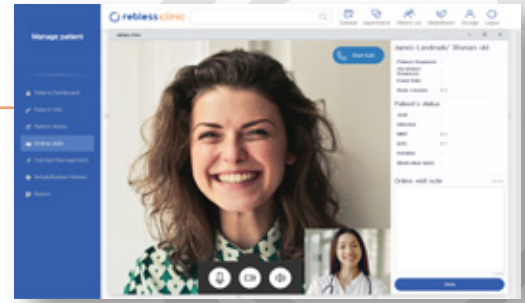

Online visits

Decrease the likelihood of no-show appointments.

Time & Cost Saving

With the rebless Clinic app, providers can view patient data and provide consultation from anywhere. Telemedicine visits are scheduled and performed with patients through the click of a button.

How it works

rebleless™ Clinic

rebleless™ App

rebleless™

The assigned therapy regimen is accessed in the rebleless™ mobile app for the patient to perform. All patient data is viewable on the provider's rebleless™ Clinic app for seamless remote monitoring of activity and progress.

H Robotics develops, manufactures, and distributes state-of-the-art rehabilitation solutions, including medical robots and data-driven, telemedicine offerings for people who suffer with stroke complications and other neurological or musculoskeletal diseases. By leveraging our strengths in software and robotic technology, we aim to create products and services that provide value to our customers and contribute to a healthier world and a happier life.
