

University of Missouri

**Preparing Future Faculty – Faculty Diversity  
Postdoctoral Program  
Industrial & Manufacturing Systems Engineering**

**Now accepting applications for 2022**

The University of Missouri's **Preparing Future Faculty – Faculty Diversity (PFFFD) Postdoctoral Program** is designed to develop scholars for tenure-track faculty positions at the University of Missouri and beyond. Applicants should demonstrate how they can contribute to faculty diversity, such as through membership in a group that is historically underrepresented or through other training and experience. Postdoctoral positions are typically for two years and provide research, teaching, and professional development opportunities.

The Department of Industrial and Manufacturing Systems Engineering (IMSE) at the Mizzou is seeking Postdoctoral Researchers that have strength in **human factors or data analytics applied to healthcare systems, logistics or manufacturing** to complement our current faculty. The University of Missouri provides unique opportunities for collaboration across a broad range of academic disciplines. The salary offered will include an additional stipend in order to be competitive within the industrial engineering field.

Please visit the [PFFFD webpage](#) to learn more about the program and to apply online by September 27, 2021. If you have any questions about applying to our research area, specifically, I am happy to answer your questions.

Sincerely,

Jim Noble, Chair  
Industrial & Manufacturing Systems Engineering
