

Women in Engineering Student Event

Join us for a student outreach event focused on college women in technical majors

On Friday, September 24th the SSPI Mid-Atlantic Regional Chapter will host an event geared toward women in technical majors at universities in the Washington, DC, metro area. The event will begin with a panel discussion with women in the space and satellite industry sharing their views on challenges they've faced in their careers and offering advice for younger professionals and aspiring space and satellite professionals.

Following the panel, we will hold a "speed networking" session where attendees will be broken up into smaller groups to talk with younger women professionals about their more recent experiences in job hunting and working as a woman in a technical career.
